

Instructions for EV Charging at Lamont

Lamont has two dual port EV Charging stations on campus: One in the small parking lot to the left of the Oceanography building and another between the Borehole and Tree Ring Lab buildings.

Using the Lamont EV charging stations requires setting up a Chargepoint account and downloading the Chargepoint App. A ChargePoint account can be created [at this link](#). The Chargepoint App can be downloaded on the Google Play store or the App Store on iPhones. For users that do not have a smart phone, a Chargepoint card linked to their account can be used to initiate a charge. This card can be requested on the Chargepoint website after an account is created.

Chargepoint accounts must be linked to a credit card whether they use a phone or the Chargepoint card to initiate a charge. The cost for charging at the Borehole or Oceanography stations is \$2 per hour. A credit card can be added to a Chargepoint account by selecting Account>Payment>Add Payment in the Chargepoint app.

For users with smartphones, the Lamont stations must be manually added to their app because they are not available to the public. To add the stations follow the instructions below or on the [Chargepoint Website](#):

Open your Chargepoint App
Select the Menu icon in the top left
Select Accounts and then Connections
Click on Browse Connections
Enter the code **LDEODrivers**

Once a Chargepoint account has been set up, smart phone users can initiate a charge by signing into the app and simply [tapping their phone](#) to the front of the station OR by selecting “Start Charge” on the individual charger page of the app.

Please **do not** try to pull the charger out before using your phone or Chargepoint card to start a charge!

For more information, [see the Chargepoint FAQ](#). They have very detailed answers to the most common questions about their services.

Please feel free to email angelal@ldeo.columbia.edu with any additional questions.
